

## **Random Number Generator Certificate**

**Operator:** WYZ Games Pvt. Ltd.

**Operator URL:** [www.pokabunga.com](http://www.pokabunga.com)

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by WYZ Games Pvt. Ltd. and found that the RNG complies with the relevant standards.\*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has also conducted shuffling tests for Poker and Rummy games using 2 decks of cards with and without jokers. The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.
